

SHARES Field Day

Contributed by Bob Nelson, WA7ARC
Wednesday, 25 June 2008

SHARES will run a separate, but parallel event on Field Day. From 1800Z to 2100Z this coming Saturday, our voice national net controls will be monitoring the SHARES primary frequency and taking your check-ins from all SHARES members. Whether you're in the field for Field Day or at home we are opening our doors to the SHARES community for three hours this Saturday.

SHARES Digital Broadcast is conducted on Wednesdays, using the MT63 mode. Broadcast starts at 1600Z and repeats every ten minutes. SHARES members know the frequency.

Frequencies and Call-Sign information for this event (as for all SHARES events) are FOUO, available to registered members of the SHARES network.

As always, check the SHARES website for additional information.
